COLLABORATIONS

Outside of collaborating with students and professors at my own university, I have established a global network of collaborators through networking at conferences and symposiums. Some of these collaborations have already borne fruit, and I have papers, published or forthcoming, that stem from work with researchers from Stanford University (US), University of Michigan (US), the University of Toronto (Canada), and the Gwangju Institute of Science and Technology (South Korea). Others are still in their initial stages, but I am hopeful they will be successful in the future. These include research groups from PXL University of Applied Sciences and Arts (Belgium), the University of Lübeck (Germany), and my alma mater, the University of Campinas (Brazil).
